PTFE Diaphragm Membrane Design for Improved Chemical Compatibility

Choice of steel or plastic shell materials

Fully customizable process connection (female thread, flange or hub)

Proprietary Charging Valve with Dual Seated, Poppet Design for Maximum Reliability

Blue Fluorocarbon Coated Stud-Bolts for Improved Protection in Harsh Environments

Certified Material Test Certificates

Welding Qualification and Procedures

ASME VIII, Div. 1 Design Calculations

Compliance to most project specifications

All designs are fully customizable including, but not limited to: pressure rating, connection size & type and materials of construction.

Standard non-wetted o-ring material options include: NBR, EPDM, Viton and PTFE encapsulated rubber. Kalrez o-rings are available upon request.

Common shell materials: 316 Stainless Steel, 316/316L Stainless Steel, Hastelloy C276, Monel, Titanium, Duplex Stainless Steel, Alloy 20 and Low Temperature Carbon Steel.

Plastic shell material options include PVC, Polypropylene and PVDF (Kynar). Plastic dampeners are limited to a pressure rating of 10 BarG at 30°C.
